

CIE IGCSE COMPUTER SCIENCE (0478)

Programme Support Document

STUDENT INTERVENTION PROTOCOL

学生干预协议

Document Reference: VPA-CS-SUP05

Prepared by: Connor Scanlan | Curriculum Developer

Date: June 2026

Status: Working Document for Academic Year 2026–2028

Review Cycle: Annual

PURPOSE STATEMENT | 目的声明

This protocol establishes a systematic, proactive framework for supporting all students who may face barriers to success in the CIE IGCSE Computer Science (0478) programme. It covers students joining mid-year, students with Special Educational Needs (SEN), students requiring EAL support, and students who need academic remediation.

本协议为支持所有可能在剑桥 IGCSE 计算机科学(0478)课程中面临成功障碍的学生建立一个系统化、主动的框架。它涵盖中途入学学生、有特殊教育需求(SEN)的学生、需要 EAL 支持的学生以及需要学术补救的学生。

Core Principle | 核心原则:

Every student can succeed with the right support at the right time.

在正确的时间提供正确的支持，每位学生都能成功。

SECTION 1: LATE JOINERS | 第 1 节：晚期加入学生

Students who join Victoria Park Academy Shenzhen during an active semester, having missed some or all prior Computer Science instruction.

在学期进行中加入维多利亚公园学院深圳、错过了部分或全部先前计算机科学教学的学生。

1.1 INITIAL ASSESSMENT OF PRIOR KNOWLEDGE → 先验知识初步评估

Within the first 3 school days, the student completes:

学生在前 3 个上学日内完成：

- Prior Knowledge Check (30 questions, 30 minutes)

先验知识检查（30 道题，30 分钟）

- 10 questions: Basic digital literacy (file management, typing, internet)

基础数字素养（文件管理、打字、互联网）

- 10 questions: Mathematical reasoning (binary logic, number systems)

数学推理（二进制逻辑、数制）

- 10 questions: Problem-solving (algorithmic thinking, sequencing)

问题解决（算法思维、排序）

- Informal Interview with teacher (10–15 minutes)

与教师的非正式面谈（10–15 分钟）

- Previous school CS experience 先前学校 CS 经验

- Access to computer at home 家中是否有电脑

- Confidence level with technology 对技术的信心水平

- Preferred learning style 偏好的学习风格

- Practical Task: Create a simple flowchart (15 minutes)

实践任务：创建一个简单流程图（15 分钟）

- Tests current understanding of logic and sequencing

测试对逻辑和排序的当前理解

1.2 CATCH-UP PLAN WITH PRIORITISED TOPICS → 带优先主题的追赶计划

Based on assessment results, a personalised catch-up plan is created:

根据评估结果，制定个性化追赶计划：

PRIORITY LEVELS → 优先级级别:

Priority 1 — CRITICAL (Complete within 2 weeks) → 关键（2 周内完成）

└─ Topic 1.1: Types and Components of Computer Systems

主题 1.1：计算机系统的类型与组件

└─ Topic 1.2: Input and Output Devices

主题 1.2：输入与输出设备

└─ Topic 2.1: Binary, Denary, and Hexadecimal

主题 2.1：二进制、十进制与十六进制

└─ Topic 4.1: Types of Network

主题 4.1：网络类型

Priority 2 — ESSENTIAL (Complete within 4 weeks) → 必要（4周内完成）

└─ Topic 3.1: Data Storage and Compression

主题 3.1：数据存储与压缩

└─ Topic 5.1: Security Threats and Prevention

主题 5.1：安全威胁与防护

└─ Topic 6.1: Operating Systems and Utility Software

主题 6.1：操作系统与工具软件

Priority 3 — IMPORTANT (Complete within 6 weeks) → 重要（6周内完成）

└─ Topic 7.1: Ethics, Intellectual Property, and Privacy

主题 7.1：伦理、知识产权与隐私

└─ Topic 8.1: Emerging Technologies and AI

主题 8.1：新兴技术与人工智能

Priority 4 — EXTENSION (As time allows) → 拓展（视时间而定）

└─ Additional programming practice and enrichment tasks

额外编程练习与拓展任务

1.3 BUDDY SYSTEM → 伙伴制度

Each late joiner is paired with a "Buddy" — a secure student from the same class who has demonstrated strong understanding and positive attitude.

每位晚期加入学生与一位"伙伴"配对——来自同班的、表现出扎实理解和积极态度的安全学生。

Buddy Responsibilities → 伙伴职责：

- Help new student navigate class routines and digital resources

帮助新生熟悉课堂常规和数字资源

- Check in weekly on catch-up progress

每周检查追赶进度

- Answer questions about worksheets and homework

回答关于练习册和家庭作业的问题

- Include new student in group activities

在小组活动中包含新生

Teacher monitors buddy pairings and rotates buddies if needed.

教师监督伙伴配对，必要时更换伙伴。

1.4 MODIFIED WORKSHEET SET → 调整练习册套装

Late joiners receive a condensed worksheet set for rapid catch-up:

晚期加入学生收到精简练习册套装以快速追赶：

Feature 特点:

- Core concepts only — removed enrichment and extension sections

仅核心概念——移除拓展和延伸部分

- Step-by-step worked examples for every exercise

每个练习都附逐步解答示例

- Vocabulary box with key terms at the top of each sheet

每页顶部的词汇框，包含关键术语

- Visual-heavy format with diagrams and icons

视觉丰富的格式，包含图表和图标

- Bilingual annotations for key instructions

关键指令的双语注释

Delivery 发放方式:

- Physical folder with numbered worksheets in priority order

按优先顺序编号练习册的实体文件夹

- Digital copy on Google Classroom / Teams

Google Classroom / Teams 上的数字副本

- Answer key for self-checking (released after submission)

自检查答案键（提交后发布）

SECTION 2: SEN ACCOMMODATIONS | 第2节：SEN 支持安排

Victoria Park Academy Shenzhen is committed to inclusive education. Students with identified Special Educational Needs receive the following accommodations in Computer Science.

维多利亚公园学院深圳致力于全纳教育。有已识别特殊教育需求的学生在计算机科学课程中享受以下支持安排。

2.1 EXTENDED TIME FOR ASSESSMENTS → 评估延长时间

- Standard: 25% additional time on all quizzes, mocks, and in-class tests

标准：所有测验、模拟和课堂测试增加 25%时间

- Mock exams: Paper 1 (90 min → 112 min), Paper 2 (90 min → 112 min)

模拟考试：试卷一（90 分钟→112 分钟），试卷二（90 分钟→112 分钟）

- Practical programming tasks: No strict time limit; completion is priority

实际编程任务：无严格时间限制；完成为优先

- Application: SEN Coordinator confirms eligibility; teacher implements

申请：SEN 协调员确认资格；教师执行

Note: Extended time mirrors CIE exam access arrangements. All documentation is kept on file for external exam applications.

注意：延长时间与 CIE 考试准入安排一致。所有文件存档备用于外部考试申请。

2.2 REDUCED WORKSHEET LENGTH → 精简练习长度

Standard worksheets are adapted to focus on core concepts only:

标准练习册经过调整，仅聚焦核心概念：

Adaptation Method 调整方法:

- Questions reduced by 30–40% (e.g., 10 questions → 6 core questions)

题目减少 30–40%（如 10 题→6 道核心题）

- Multi-part questions: student completes Part A (essential) only

多部分题目：学生仅完成 A 部分（必要部分）

- Optional challenge section clearly marked (student's choice)

可选挑战部分明确标记（学生自选）

- Larger font size (14pt minimum) and increased line spacing

更大字号（最小 14 磅）和增加行距

Quality Not Compromised → 质量不妥协:

- All SEN-adapted worksheets cover the same learning objectives

所有 SEN 调整练习册涵盖相同学习目标

- Assessment criteria remain identical

评估标准保持一致

- Students progress through the same curriculum at their pace

学生按自己的节奏通过相同课程进度

2.3 VISUAL AIDS AND PHYSICAL DEMONSTRATIONS → 视觉辅助与实物演示

Visual and kinaesthetic support is embedded in every lesson:

每节课都嵌入视觉和动觉支持：

Embedded Resources 嵌入资源:

- Physical components box: real RAM sticks, hard drives, cables, routers

实物组件盒：真实内存条、硬盘、线缆、路由器

- Network topology demonstration using physical string and node cards

使用实体线和节点卡演示网络拓扑

- Logic gate truth tables as laminated cards for manipulation

逻辑门真值表作为可操作的塑封卡片

- Binary conversion practice with physical place-value boards

使用实体位值板练习二进制转换

- Colour-coded syntax highlighting on all pseudocode examples

所有伪代码示例采用彩色语法高亮

Digital Tools 数字工具:

- Interactive circuit simulators (free online platforms)

交互式电路模拟器（免费在线平台）

- Visual flowchart builder with drag-and-drop interface

带拖放界面的可视化流程图构建器

- Animated binary/hex conversion tools

动画二进制/十六进制转换工具

2.4 SCRIBE SUPPORT → 书写辅助

For students with documented writing difficulties:

为有书写困难记录的学生：

- Scribe provided for formal mock examinations where appropriate

在适当情况下为正式模拟考试提供书写员

- Scribe writes exactly what the student dictates

书写员准确书写学生口述内容

- Student may review and correct scribed answers before submission

学生可在提交前检查并修正书写内容

- Arranged through SEN Coordinator with advance notice (minimum 1 week)

通过 SEN 协调员安排，需提前通知（最少 1 周）

Alternative → 替代方案:

- Voice-to-text software for in-class assessments (where available)

课堂评估中使用语音转文字软件（如可用）

- Typed responses instead of handwritten (for eligible students)

打字回答代替手写（符合资格学生）

2.5 ALTERNATIVE ASSESSMENT FORMATS → 替代评估格式

Where standard exam format creates barriers, alternatives are offered:

在标准考试格式造成障碍的情况下，提供替代方案：

Option A: Oral Assessment Component → 口头评估部分

- 10-minute structured conversation with teacher

与教师进行 10 分钟结构化对话

- Student explains concepts verbally using visual prompts

学生使用视觉提示口头解释概念

- Used for: Topic 1 (Hardware), Topic 5 (Security) — conceptual subjects

用于：主题 1（硬件）、主题 5（安全）——概念性科目

Option B: Practical Demonstration → 实践演示

- Student demonstrates skill rather than writing about it

学生展示技能而非书写描述

- Used for: Logic gate construction, network setup, algorithm tracing

用于：逻辑门构建、网络设置、算法追踪

Option C: Extended Portfolio → 扩展作品集

- Student compiles evidence of understanding across multiple tasks

学生在多项任务中汇编理解证据

- Used for: students who need extended time to demonstrate competence

用于：需要更多时间展示能力的学生

SECTION 3: MID-YEAR TRANSFERS | 第 3 节：年中转学学生

Students who transfer to VPA Shenzhen from another school during the academic year, bringing varied prior Computer Science experience.

在学年期间从其他学校转入 VPA 深圳的学生，带来不同程度的先前计算机科学经验。

3.1 DIAGNOSTIC ASSESSMENT WITHIN FIRST WEEK → 第一周内进行诊断评估

Day 1-3: Welcome and Observation

第 1-3 天：欢迎与观察

- Student introduced to class and digital systems

学生被介绍给班级和数字系统

- Teacher observes student's comfort with technology

教师观察学生对技术的舒适度

- Informal conversation about previous CS learning

关于先前 CS 学习的非正式交流

Day 4-5: Formal Diagnostic Test (45 minutes)

第 4-5 天：正式诊断测试（45 分钟）

- 20 multiple-choice questions covering Units 1-8 key concepts

20 道选择题，涵盖单元 1-8 关键概念

- 1 short programming task (pseudocode or flowchart)

1 道短编程任务（伪代码或流程图）

- Self-assessment confidence scale (1-5) for each topic

每个主题的自我评估信心量表（1-5 分）

Day 5: Results and Planning Meeting

第 5 天：结果与规划会议

- Teacher reviews diagnostic with student

教师与学生一起审阅诊断结果

- Preliminary catch-up timeline created

创建初步追赶时间表

- Student voice: what topics do they feel most/least confident about?

学生声音：他们对哪些主题最有/最没信心？

3.2 PERSONALISED CATCH-UP TIMELINE → 个性化追赶时间表

A detailed week-by-week plan is created for each transfer student:

为每位转学学生制定详细的逐周计划：

SAMPLE TIMELINE: Student joining in Y10S2 (Semester 2)

样本时间表：学生在九年级第二学期加入

Week 1: Diagnostic assessment + plan creation + buddy assignment

诊断评估 + 计划制定 + 伙伴分配

Week 2-3: Priority 1 topics (Binary, Hardware, Networks — foundation)

优先 1 主题（二进制、硬件、网络——基础）

Week 4-5: Priority 2 topics (Storage, Security, Software)

优先 2 主题（存储、安全、软件）

Week 6-7: Priority 3 topics (Ethics, Emerging Tech) + Mock 2 preparation

优先 3 主题（伦理、新兴技术）+ 模拟 2 准备

Week 8+: Full integration with class + continued individual support

完全融入班级 + 持续个人支持

The timeline is reviewed and adjusted every 2 weeks based on progress.

时间表每 2 周根据进度审查并调整。

3.3 PARENT COMMUNICATION ABOUT GAPS AND PLAN → 与家长沟通差距与计划

Within 10 school days of arrival, the following communication is sent:

学生到校后 10 个上学日内，发送以下沟通内容：

Email / WeChat Message to Parents 给家长的电子邮件/微信消息:

Subject: [Student Name] Computer Science Catch-Up Plan — VPA Shenzhen

主题：[学生姓名] 计算机科学追赶计划 — VPA 深圳

Contents 内容:

1. Welcome message and overview of CS programme

欢迎消息和 CS 课程概述

2. Diagnostic assessment results (summary)

诊断评估结果（摘要）

3. Identified knowledge gaps (in plain language)

已识别的知识差距（通俗易懂的语言）

4. Personalised catch-up plan with timeline

个性化追赶计划及时间表

5. How parents can support at home

家长如何在家支持

6. Contact information for questions

问题咨询联系方式

7. Invitation to meeting (if required)

会议邀请（如需要）

Follow-up: Weekly brief update via class communication channel

跟进：通过班级沟通渠道每周简短更新

3.4 INTEGRATION WITH EXISTING PEER GROUPS → 融入现有同伴群体

Academic Integration 学术融入：

- Transfer student joins whole-class instruction immediately

转学学生立即加入全班教学

- Targeted revision groups include transfer student by topic need

针对性复习小组按主题需要包含转学学生

- Pair programming and group activities strategically assigned

策略性分配结对编程和小组活动

Social Integration 社交融入：

- Buddy system (as described in Section 1.3)

伙伴制度（如第 1.3 节所述）

- Teacher facilitates introduction to study groups and group chats

教师协助介绍学习群和群聊

- Check-in at Weeks 2, 4, and 8 on social adjustment

第 2、4、8 周检查社交适应情况

SECTION 4: RE-SIT AND REMEDIATION | 第 4 节：补考与补救

For students who fail to achieve minimum standards in mock examinations or classroom assessments.

针对在模拟考试或课堂评估中未达到最低标准的学生。

4.1 TARGETED REVISION PLAN → 针对性复习计划

Trigger: Student scores below 40% on any mock exam or assessment

触发条件：学生在任何模拟考试或评估中得分低于 40%

Immediate Actions (within 1 week of result):

即时行动（成绩发布后 1 周内）：

1. One-to-one meeting with teacher to review errors in detail
与教师一对一会面，详细审阅错误
2. Updated Gap Analysis Form completed (see Document SUP04)
完成更新的差距分析表（见文件 SUP04）
3. Personalised revision schedule created — minimum 3 sessions per week
制定个性化复习时间表——每周最少 3 次
4. Parent notification with specific action plan
通知家长并提供具体行动计划

Revision Schedule Components → 复习计划组成:

- Session A (20 min): Topic re-teaching with worked examples
A 环节（20 分钟）：主题重教与示例讲解
- Session B (20 min): Guided practice with teacher support
B 环节（20 分钟）：教师指导下的练习
- Session C (20 min): Independent practice with self-checking
C 环节（20 分钟）：独立练习与自我检查

Duration: Minimum 2 weeks, extended as needed based on re-sit result

持续时间：最少 2 周，根据补考结果按需延长

4.2 RE-SIT OPPORTUNITIES → 补考机会

Students who fail mocks are given re-sit opportunities with different paper versions to ensure genuine learning rather than memorisation.

未通过模拟考试的学生获得不同试卷版本的补考机会，以确保真正的学习而非记忆。

Re-Sit Schedule → 补考时间表:

- Re-sit offered 2 weeks after original mock

原模拟考试后 2 周提供补考

- Different question paper (same topics, different questions)

不同试题（相同主题，不同题目）

- Same format and time conditions as original

与原版相同的形式和时间条件

Expected Outcome → 预期结果:

- Student must improve by minimum 10 percentage points to exit intervention

学生必须提高至少 10 个百分点才能退出干预

- If target not met: extended intervention continues

如未达目标：继续延长干预

- All re-sit results recorded on Progress Tracker

所有补考结果记录在进度追踪表上

4.3 ONE-TO-ONE SUPPORT SESSIONS → 一对一支持课程

For students requiring intensive individual support:

针对需要强化个人支持的学生：

Format 形式:

- 20-25 minute sessions, 2-3 times per week

每次 20-25 分钟，每周 2-3 次

- Scheduled during lunch, after school, or within study periods

安排在午餐时间、放学后或自习时段

- Conducted by subject teacher or designated support staff

由科目教师或指定支持人员执行

Session Structure → 课程结构:

1. Review previous session's learning (3 min)

复习上节课的学习内容

2. Targeted teaching on specific weak topic (10 min)

针对特定薄弱主题的针对性教学

3. Guided practice with immediate feedback (10 min)

引导练习与即时反馈

4. Set independent task for next session (2 min)

为下节课布置独立任务

Documentation: Record kept in student intervention log

文档记录：记录在学生的干预日志中

4.4 CONFIDENCE BUILDING STRATEGIES → 信心建立策略

Academic confidence is essential for exam success. The following strategies are employed alongside academic support:

学术信心对考试成功至关重要。以下策略与学术支持同时使用：

Strategy 1: Success Ladder 成功阶梯

- Break topics into micro-skills (e.g., "convert 8-bit binary to denary")

将主题分解为微技能（如“将 8 位二进制转换为十进制”）

- Student ticks off each micro-skill as mastered

学生掌握每个微技能后打勾

- Visual progress board in classroom

教室中的可视化进度板

Strategy 2: Strength Spotlight 优势聚焦

- Teacher identifies 3 things student does well

教师识别学生做得好的 3 件事

- Share with student and parent weekly

每周与学生和家长分享

- Build from strengths to address weaknesses

从优势出发解决薄弱点

Strategy 3: Mock Rehearsal Routine 模拟演练常规

- Practice mock exam conditions regularly (not just assessment weeks)

定期练习模拟考试条件（不仅在评估周）

- Familiarity reduces anxiety

熟悉度减少焦虑

- Build exam technique alongside knowledge

在知识积累的同时建立考试技巧

Strategy 4: Peer Tutoring Role 同伴辅导角色

- Struggling student pairs with secure student for specific topics

struggling 学生与扎实学生配对学习特定主题

- Explaining to others builds confidence and reinforces learning

向他人解释建立信心并巩固学习

- Role reversal: struggling student teaches peer something they know

角色互换：struggling 学生教同伴他们懂的内容

SECTION 5: EAL-SPECIFIC INTERVENTIONS | 第 5 节：EAL 专项干预

English as an Additional Language (EAL) students receive targeted language support to ensure that language proficiency does not become a barrier to Computer Science achievement.

英语作为附加语言(EAL)学生获得针对性语言支持，以确保语言能力不会成为计算机科学成就的障碍。

5.1 PRE-TEACHING VOCABULARY BEFORE LESSONS → 课前预教词汇

Before each new unit or topic, EAL students receive:

在每个新单元或主题之前，EAL 学生收到：

Vocabulary Pre-Teaching Pack 词汇预教包:

- 10–15 key terms for the upcoming topic

即将学习的主题的 10–15 个关键术语

- Each term: English definition, Chinese translation, visual icon

每个术语：英文定义、中文翻译、视觉图标

- Example sentence in context

语境中的例句

- Pronunciation guide (phonetic spelling)

发音指南（音标拼写）

Timing 时间:

- Distributed 2–3 days before new topic begins

在新主题开始前 2–3 天分发

- 10-minute review at start of first lesson on new topic

新主题第一节课前 10 分钟复习

- Reinforcement through starter activities in first 3 lessons

通过前 3 节课的导入活动强化

Example: Unit 4 — Networks

示例：单元 4——网络

Term: "Router" → 路由器

Definition: A device that forwards data between different networks

定义：在不同网络间转发数据的设备

Visual: [Image of router] → 图标：[路由器图片]

Example: "The router connects the school network to the internet."

例句："路由器将我们学校的网络连接到互联网。"

5.2 BILINGUAL GLOSSARY CARDS FOR EVERY UNIT → 每单元双语词汇卡

Every unit in the IGCSE Computer Science course has a dedicated set of bilingual glossary cards.

IGCSE 计算机科学课程的每个单元都有一套专门的双语词汇卡。

Glossary Card Format → 词汇卡格式:

TERM / 术语

router / 路由器

DEFINITION / 定义

A device that forwards data between computer networks

在计算机网络之间转发数据的设备

KEYWORD IN CONTEXT / 语境中的关键词

"The ____ connects your home to the internet."

"____将您的家连接到互联网。"

RELATED TERMS / 相关术语

switch / 交换机 → modem / 调制解调器 → bandwidth / 带宽

Usage 使用方法:

- Physical card sets available for classroom use

实体卡片套装供课堂使用

- Digital version on Google Classroom for home study

Google Classroom 上的数字版本供家庭学习

- Laminated reference sheet for each unit test

每单元测试的塑封参考页

- Students encouraged to create their own cards as revision activity

鼓励学生制作自己的卡片作为复习活动

5.3 SENTENCE STARTERS FOR EXAM QUESTIONS → 考试题句子开头

EAL students are provided with sentence starters for common exam question types to help structure their responses and reduce cognitive load.

为 EAL 学生提供常见考试题型的句子开头，以帮助他们组织回答并减少认知负荷。

Question Type 1: State/Identify → 陈述/识别题

- "The answer is ____." → "答案是____。"
- "This is called ____." → "这被称为____。"
- "The correct term is ____." → "正确的术语是____。"

Question Type 2: Describe → 描述题

- "____ is a type of ____ . It works by ____."

"____是一种____。它通过____工作。"

- "The purpose of ____ is to ____."

"____的目的是____。"

- "First, ____ . Then, ____ . Finally, ____."

"首先，____。然后，____。最后，____。"

Question Type 3: Explain → 解释题

- "____ happens because ____." → "____发生是因为____。"

- "The reason for this is ____." → "这样做的原因是____。"

- "This means that ____, which results in ____."

"这意味着____，从而导致____。"

Question Type 4: Compare → 比较题

- "____ and ____ are similar because ____."

"____和____相似，因为____。"

- "However, ____ is different because ____."

"然而，____不同，因为____。"

- "One advantage of ____ is ____, whereas one advantage of ____ is ____."

"____的一个优点是____，而____的一个优点是____。"

Question Type 5: Evaluate/Discuss → 评估/讨论题

- "One benefit of ____ is _____. However, a drawback is _____."

"____的一个好处是____。然而，一个缺点是____。"

- "In my opinion, ____ because _____." → "在我看来，____因为____。"

- "Overall, I believe ____ is better because _____."

"总的来说，我认为____更好，因为____。"

Distribution 分发:

- Laminated card kept in student's folder

塑封卡片存放在学生文件夹中

- Displayed on classroom wall for reference

张贴在教室墙上供参考

- Used during all practice assessments

在所有练习评估中使用

5.4 EXTRA PROCESSING TIME FOR ENGLISH-HEAVY QUESTIONS → 英语密集题额外处理时间

Certain exam questions contain dense English text that may slow comprehension for EAL students. The following accommodations apply:

某些考试题包含密集的英语文本，可能减缓 EAL 学生的理解速度。适用以下安排：

Time Accommodation → 时间安排:

- 25% extra time on all formal assessments (as per SEN policy)

所有正式评估增加 25%时间（按 SEN 政策）

- Additional 5 minutes per long-answer question (6+ marks) for reading

每道长答题（6 分以上）额外 5 分钟阅读时间

Format Accommodation → 格式安排:

- Long questions may be read aloud by teacher on request

长题可按教师要求朗读

- Key terms highlighted in question paper

试题中的关键术语高亮

- Questions may be rephrased in simpler English (not simplified content)

题目可用更简单的英语重新表述（不简化内容）

Practice Support → 练习支持:

- Regular exposure to exam-style questions with timed conditions

在计时条件下定期接触考试风格题目

- "Question deconstruction" exercises — identify what the question asks

"题目解构"练习——识别题目要求

- Bilingual glossary available during all practice assessments

所有练习评估中提供双语词汇表

INTERVENTION RECORD KEEPING | 干预记录保存

All interventions are documented in a central Student Intervention Log:

所有干预措施均记录在中央学生干预日志中：

- Student name and ID

学生姓名和 ID

- Date intervention started

干预开始日期

- Type of intervention (Late Joiner / SEN / Transfer / Re-sit / EAL)

干预类型（晚期加入/SEN/转学/补考/EAL）

- Specific accommodations provided

提供的具体支持安排

- Baseline assessment result

基线评估结果

- Progress notes (updated weekly)

进度记录（每周更新）

- Review dates and outcomes

审查日期和结果

- Exit criteria and date

退出标准和日期

Review Cycle: Every 2 weeks for active interventions; every 4 weeks for monitoring.

审查周期：活跃干预每 2 周；监控阶段每 4 周。

CONTACT & ESCALATION | 联系与升级

Tier 1: Subject Teacher 科目教师

- First point of contact for all student concerns

所有学生问题的第一联系点

- Implements accommodations and tracks progress

执行支持安排并追踪进度

Tier 2: SEN Coordinator / EAL Lead SEN 协调员/EAL 负责人

- Supports complex cases and external exam applications |
支持复杂案例和外部考试申请 |
- Provides specialist resources and training |
提供专业资源和培训 |
- Tier 3: Head of Department + Academic Leadership |
系主任 + 学术领导 |
- Reviews intervention effectiveness across the cohort |
审查整个年级的干预效果 |
- Allocates additional resources if needed |
如需则分配额外资源 |

For questions about this protocol, contact: Connor Scanlan, Curriculum Developer

如有关于本协议的问题，请联系：Connor Scanlan，课程开发人员
